London E7 9QA | 07405 611 966 | hasibulhaque1000@gmail.com | linkedin.com/in/hasibulhaque\_001

## PROFILE

Third-year Pharmacology student at London Metropolitan University with strong practical expertise in cell and molecular biology techniques, analytical chemistry, and microplastic characterisation. Experienced in operating and maintaining laboratory equipment, managing samples, and working to health and safety and GLP standards. Currently completing a final-year research dissertation on microplastic analysis in commercial products. Seeking a laboratory technician position to apply these skills in a high-quality research environment.

## EDUCATION

**BSc (Hons) Pharmacology** | London Metropolitan University, London 2023 – Present

*Year 3 modules (all graded A): Toxicology, Systems Pharmacology, Systems Pathology.*

*Year 2 modules (all graded A): Microbiology, Immunity, Spectroscopic Methods.*

- Conducted practical experiments across cell and molecular biology: PCR, bacterial transformation, recombinant plasmid analysis, and agarose gel electrophoresis, developing direct experience with the techniques central to molecular biology laboratory support.
- Operated and maintained a range of analytical equipment including spectrophotometers, chromatography systems, and pH meters; experienced in troubleshooting instrument and experimental issues.
- Applied quantitative laboratory skills including serial dilutions, concentration calculations, transformation efficiency, and standard and semi-log curve analysis in assessed laboratory reports.
- Maintained accurate records, labelling, and sample management throughout all practical sessions in accordance with health and safety protocols.
- Authored a 2,000-word research report on agarose gel electrophoresis; delivered a presentation on mass spectrometry and NMR spectroscopy to academic staff and peers, responding to detailed questions.

**A Level & O Level – Science** | ST. Joseph Higher Secondary School, Bangladesh 2018 – 2021

- A Level Science: GPA 5.00/5.00. O Level Science: GPA 5.00/5.00. Awarded a scholarship for outstanding academic performance at O Level.

## RESEARCH PROJECT

**Final Year Dissertation** | London Metropolitan University, London 2025 – Present

### **Qualitative and Quantitative Analysis of Microplastics in Commercial Chewing Gum**

- Designed and conducted a laboratory-based study to extract and characterise microplastic particles from commercial chewing gum samples using artificial saliva and KOH solution to simulate oral and chemical digestion conditions.
- Used optical microscopy to identify and count suspected microplastic particles, applying systematic visual analysis techniques to classify particles by size, shape, and colour.
- Confirmed plastic polymer composition by obtaining FTIR (Fourier Transform Infrared Spectroscopy) spectra and cross-referencing results against an online spectral library database, demonstrating competency in analytical instrumentation and data interpretation.
- Developed skills in experimental design, method optimisation, and scientific writing, producing a full research dissertation in accordance with academic standards.

## EMPLOYMENT

**Assistant Laboratory Technician** | Udvash Coaching Centre, Dhaka Jul 2021 – Jul 2023

- Prepared reagents, chemicals, and apparatus for laboratory sessions, ensuring all equipment was available, functional, correctly labelled, and safely stored ahead of practical activities.
- Monitored stock levels of chemicals and consumables, identifying shortages and arranging replenishment to maintain uninterrupted laboratory operations.
- Identified and resolved equipment faults prior to practical sessions, maintaining a safe, clean, and efficient working environment at all times.

- Maintained detailed and accurate records of experimental results and laboratory activities, ensuring consistency and reliability across student evaluations.
- Supported students and teaching staff during practical sessions by demonstrating safe equipment use, explaining procedures, and troubleshooting issues as they arose.

#### **Front of House Team Member** | German Doner Kebab, London

*Sep 2023 – Present*

- Worked reliably as part of a team in a fast-paced environment, demonstrating time management, attention to detail, and clear communication under pressure.
- Maintained hygiene and food safety standards in line with food safety regulations, demonstrating a disciplined approach to compliance — transferable to laboratory health and safety requirements.
- Holder of a Level 2 Food Hygiene Certificate, demonstrating formal training in safe working practices and regulatory compliance.

#### **SKILLS**

- Cell and molecular biology techniques: PCR, bacterial transformation, agarose gel electrophoresis, plasmid analysis — practised across Years 1–3 of BSc Pharmacology practical sessions.
- Analytical instrumentation: FTIR spectroscopy (used in dissertation to confirm microplastic polymer identity); spectrophotometry, chromatography, and pH measurement from academic and professional laboratory settings.
- Microscopy: optical microscopy used in dissertation research to identify, count, and classify microplastic particles by morphology and colour.
- Health, safety, and GLP compliance: consistently applied safety protocols and COSHH-aware working practices in both academic and professional laboratory environments.
- Inventory and equipment management: managed laboratory supplies, monitored stock, and maintained equipment readiness at Udvash Coaching Centre across a two-year period.
- Data analysis and scientific writing: produced quantitative analyses and a full research dissertation; proficient in Microsoft Office (Excel, Word, PowerPoint, Access) for data handling and reporting.
- Languages: fluent in English, Bengali, Urdu, and Hindi.
